Education

National University of Singapore – Bachelor of Computing in Computer Science Expected 2026

Focus Areas: Software Engineering and Artificial Intelligence

Relevant Coursework: AI/ML, Advanced NLP, Computer Vision, Database Systems, Operating Systems, Cloud Computing, Software Engineering, Advanced Software Testing

Skills

Languages: TypeScript, Python, Java, SQL, PHP, Dart, HTML, CSS

Frameworks: React, React Native, Flutter, Laravel, Next.js

Tools & Platforms: PostgreSQL, AWS, Kubernetes, Selenium, Appium, Jest, Prisma, Pandas, NumPy

Professional Experience

Web Developer Intern, CFTE – Singapore Dec 2025 – Jan 2026

- Partnered with the CEO on a Webflow migration POC, auditing 100+ legacy WordPress URLs to identify redundant pages, unclear content flow, and inconsistent course structures.
- Engineered an Excel-to-Webflow CMS workflow that migrated 100 pages from structured course inputs into Webflow Collections.

Product Engineer Intern, Gotrade – Singapore / Jakarta Jul 2024 – Mar 2025

- Delivered 70+ frontend and backend tickets in Flutter and Laravel across 5 releases, shipping Corporate Actions Tab, funding status visibility, and outage-handling flows.
- Contributed to a 30% increase in eligible Prestige users by launching Grow, an up-to-4.5% p.a. returns feature.
- Supported \$100K in partner-attributed net deposits by linking referral users to partner accounts through Gatsby referral links and TradeCRM workflows.
- Streamlined real-time stock price updates by replacing one-time price fetches with periodic refreshes using Flutter StreamBuilder and batched ticker APIs.

Test Automation Engineer Intern, SPH Media – Singapore May 2024 – Jul 2024

- Reduced daily regression runtime from 4 hours to 1 hour by parallelizing independent CI/CD test groups.
- Converted 100+ manual Straits Times mobile test cases into Java and Appium regression tests.
- Stabilized Berita Harian tests by fixing 40+ flaky Selenium cases and centralizing waits and UI actions.

Technical Projects

ITS Frontend Manager github.com/kanna-1/its-frontend-manager

- Developed a Next.js and Prisma autograder platform that parsed code submissions from Monaco Editor and evaluated them against reference solutions via NUS ITS APIs.
- Validated submission, grading, and authentication flows with 50 Jest test cases.

Competitions & Hackathons

IMC Prosperity 4 – #53 Global, #1 Singapore Apr 2026 – May 2026

- Finished #53 out of 18,000+ teams globally, ranking #1 in Singapore and 5th in Asia as team 88th Street.
- Built and iterated Python trading strategies across five rounds for market making, statistical arbitrage, and Black-Scholes options pricing, plus manual trading challenges under uncertainty.

IMC x Roostoo Algorithmic Trading Competition – Top 25 Singapore Mar 2026

- Placed top 25 in Singapore in a live algorithmic trading competition on cryptocurrency markets.
- Deployed a spread-scalping strategy with pandas and NumPy on AWS EC2, trading illiquid crypto pairs when bid-ask spreads exceeded transaction costs.
